

SNOW REMOVAL GUIDE

6 feet from the street to the car

Always park your car more than 6 feet from the street so we can blow the snow bank.

Slope going down • 6 feet from the street to the car

Always park your car more than 6 feet from the street so we can blow the snow bank.

6 feet from the street to the car shelters

Install your car shelter more than 6 feet from the street so we can blow the snow bank.

12' clearance height for trees

Prune your trees close to the entry to more than 12 feet to allow us to remove the snow completely.

8' clearance for the cars parked on the street

Always park your car at more than 8 feet of your driveway when parked in the street so we can clear the entire width of your entry.

Slope going down driveway with abrasive

You need to put abrasive in your driveway when conditions are icy especially for sloped driveway.

Snow shoveled in the center

Clean the snow in front of your garage door. You only have to bring back the snow towards the center so that we can blow all that snow on your ground on our 2nd visit.

Garbage and/or recycal bins outside the entrance

Please have your garbage and / or recycal bins outside the entrance so nothing obstruct the driveway.

Objects in the driveway (extension, logs, etc.)

Do not leave any objects in your driveway (recycling boxes, extension cords, shovels, etc.). The driver will not move any obstacles in his way.
